Usually it takes approximately two weeks for an order to be delivered to your location but in some cases may take up to three weeks.

There is however another important difference: the price.

Also we provide tracking information for all packages shipped via Courier.

All products at our site are available to be shipped - that means we have them in stock and can provide them to you immediately.

Currently there are two different shipping methods available: Regular Airmail delivery and Express Courier (EMS) delivery.

We may also restrict payment methods when we run special promotions, as credit card sales carry a high transaction fee.
